Summary

Dynamic Web Developer with over a year of experience in crafting and maintaining full-stack web applications using React.js, Next.js, Node.js, and PostgreSQL. Proven track record of modernising legacy systems and enhancing UI/UX, alongside designing secure RESTful APIs and implementing online payment solutions. Successfully built scalable business systems such as eCommerce checkouts and task management tools, demonstrating a keen focus on performance and security. Ready to bring exceptional coding skills and innovative solutions to elevate the online presence at potential employers.

Work Experience

Web Developer, Escrows Zimbabwe, Harare, Zimbabwe

08/2022 – Present

- Developed and maintained full-stack web applications using React.js, Next.js (TypeScript), Node.js, and PostgreSQL.
- Revamped and upheld legacy ASPX (VB.NET Web Forms) systems, enhancing UI/UX, performance, and code maintainability.
- Engineered and integrated RESTful APIs, prioritising secure authentication, role-based access control, and rigorous data validation.
- Instituted online payment solutions via PayPal and Paynow, facilitating both sandbox testing and production workflows.
- Constructed and deployed real-world business systems, such as eCommerce checkout flows and task management applications, with an emphasis on scalability and security.
